

OPERATING AND ASSEMBLING INSTRUCTIONS  
FOR  
GIANT-BLO MODELS  
10-T - 14-TE - 16-TE

As you unpack your Giant-Blo power unit, you will find the following parts:

- 1 - Power unit with motor and impeller.
- 1 - Air chute.
- 1 - Package of nuts, bolts and washers.

Inspect parts for any damage that might have occurred in shipping. If any is found, save the packing box and immediately notify the Transport Carrier who delivered your machine as he is responsible for the damage and is the only one to make any adjustments. Before leaving our plant, all components were completely inspected. All manufacturing dimensions are held to close tolerances, and thus, you will have little difficulty in assembling your Giant-Blo if you follow these steps.

MOTOR INSTRUCTIONS:

You have received a complete engine manual with your machine. Be sure to carefully note instructions on OILING. Fill out warranty card IMMEDIATELY and send it to the engine manufacturer, as directed. If you have any difficulties with the engine, it is best to contact the engine manufacturer rather than us as much time will be saved. If you will check the yellow pages of your telephone directory, you will find the name of the local engine dealer who would service your machine.

CAUTION  
ROTATING FAN

BEFORE MAKING ANY ADJUSTMENTS OR REPAIRS  
STOP ENGINE AND REMOVE SPARK PLUG WIRE.  
WHILE IN OPERATION KEEP ALL PARTS OF BODY  
AWAY FROM INTAKE AND EXHAUST SECTIONS.

ASSEMBLY AND OPERATION INSTRUCTIONS:

First, bolt air chute #4 on to blower housing and engine base Ref. #1. The wheel on air chute is made to run on the ground. The chain Ref. #7 will bolt to the blower housing and to air chute. Then bolt the unit on the bed of truckster. This unit is very maneuverable and ideal for cleaning complex areas such as sand traps. It has ample power to rapidly clean large areas, as well.

WARRANTY:

Within 90 days from the purchase date, GIANT-VAC MFG. INCORPORATED will replace free of charge for the ORIGINAL purchaser, any part or parts returned to our factory at South Windham, Connecticut, and found by us to be defective in material and/or workmanship.
